Observations occur when we can see something happening. In contrast, inferences are what we figure out based on an experience. Helping students understand when information is implied, or not directly stated, will improve their skill in drawing conclusions and making inferences. These skills will be needed for all sorts of school assignments, including reading, science and

AFTER writing his million-copy bestseller, *The Read-Aloud Handbook*, in 1982, Jim Trelease lectured in all 50 states and abroad, advocating the benefits of reading aloud to children. In doing so, he won the applause of both teachers and parents for his pleas in behalf of literacy efforts that contain less "pain" and more focus on turning books into friends, not enemies.

Aristotle: Logic. Aristotelian logic, after a great and early triumph, consolidated its position of influence to rule over the philosophical world throughout the Middle Ages up until the 19 th Century. All that changed in a hurry when modern logicians embraced a new kind of mathematical logic and pushed out what they regarded as the antiquated and clunky method of syllogisms.
