The vast range of maximum lifespan differences between species provides convincing evidence that longevity is genetically influenced. An elephant lives about 10–20 times longer than a mouse, yet both animals have roughly the same number of lifetime heartbeats — the elephant at 30 per minute and the mouse at 300 per minute.

MECHANISMS OF AGING - Ben Best

The actual biological transcription process works from the template strand, doing a reverse complement (TCAG → CUGA) to give the mRNA. However, in Biopython and bioinformatics in general, we typically work directly with the coding strand because this means we can get the mRNA sequence just by switching T → U.

Biopython Tutorial and Cookbook

Casey Luskin [Editor's Note: The following article is Casey Luskin's chapter, "The Top Ten Scientific Problems with Biological and Chemical Evolution," contributed to the volume More than Myth (Chartwell Press, 2014).It has been posted with permission of the book's editors, Robert Stackpole and Paul Brown. A PDF of this article can be downloaded here.

This November, Californians will vote on an initiative that would require any food containing

ingredients derived from genetically modified crops to be labeled as such.. Backers of the “California Right To Know Genetically Engineered Food Act” are pitching it as a matter of providing information to consumers, who, they argue, “have a right to know what’s in the food we buy and eat and ...

The anti-GMO campaign’s dangerous war on science

By the late 17th and early 18th centuries, the digestion of meat by stomach secretions and the conversion of starch to sugars by plant extracts and saliva were known but the mechanisms by which these occurred had not been identified.. French chemist Anselme Payen was the first to discover an enzyme, diastase, in 1833. A few decades later, when studying the fermentation of sugar to alcohol by ...

Course Listing - Farmingdale State College

Trajan was most conspicuous for his justice, for his bravery, and for the simplicity of his habits. He was strong in body, being in his forty-second year when he began to rule, so that in every enterprise he toiled almost as much as the others; and his mental powers were at their highest, so that he had neither the recklessness of youth nor the sluggishness of old age.
