Apptio fuels cost optimization. "Every single business action requires an IT action. There is no such thing anymore of those two being separate. TBM and the ability to cut cost is helping us switch those dollars to where they'll matter the most—to the business."

Cost Optimization | Apptio
An optimization algorithm is a procedure which is executed iteratively by comparing various solutions until an optimum or a satisfactory solution is found. Optimization algorithms help us to minimize or maximize an objective function $E(x)$ with respect to the internal parameters of a model mapping a set of predictors (X) to target values(Y).

Mathematical optimization - Wikipedia
IT Cost Optimization Summary Technology can play a critical role in securing long term competitive advantage and improving customer service. Innovation driven by IT is an imperative for competitive success, but too often the investment in innovation is sacrificed to "lights on" expenditures.

IT Cost Optimization – Scalable Software
Pareto efficiency or Pareto optimality is a state of allocation of resources from which it is impossible to reallocate so as to make any one individual or preference criterion better off without making at least one individual or preference criterion worse off. The concept is named after Vilfredo Pareto (1848–1923), Italian engineer and economist, who used the concept in his studies of ...

Pareto efficiency - Wikipedia
$10 per foot along the fourth side, Find the minimum total cost. • Solution: If the rectangular region has dimensions x and y, then its area is $A = xy = 3000ft2$. So $y = 3000 x$. If y is the side with fencing costing $10 per foot, then the cost for this side is $ 10 y$.
