When we introduced the type BookStore, we deliberately chose to give the type constructor BookStore a different name from the value constructor Book, purely to make it obvious which was which.. However, in Haskell, the names of types and values are independent of each other. We only use a type constructor (i.e. the type's name) in a type declaration or a type signature.

And beside Draco, Harry walked along with a smile on his face, thinking about the evolutionary origins of human intelligence. In the beginning, before people had quite understood how evolution worked, they'd gone around thinking crazy ideas like human intelligence evolved so that we could invent better tools. The reason why this was crazy was that only one person in the tribe had to invent a ...
